Prerequisites

- **<u>Software</u>**

▶ **Project Name:IOT based safety gadget for child safety monitoring and notification**

▶ **Team ID:PNT2022TMID08341**

▶ **Date:08/11/2022**

Software

▶ What is software prerequisites?

▶ The software requirements are **description of features and functionalities of the target system**. Requirements convey the expectations of users from the software product. The requirements can be obvious or hidden, known or unknown, expected or unexpected from client's point of view.

Prerequisite software

The following software is required:
- Windows Installer 3.1 or later
- Microsoft .NET Framework 4.7.1
- Microsoft Visual C++ 2017 Redistributable Package (x86)

To install these, do one of the following:
- Run RumbaPrerequisites.exe.
- Download them from the Microsoft Web site.

- Microsoft Office .NET Interoperability Assemblies

- In addition, the Microsoft Office .NET Interoperability Assemblies (PIA) is required. The PIA enables .NET managed code to interact with a Microsoft Office application's COM-based object model. In most cases, the PIA is installed during Office installation. However, sometime it is not. If you need to add the PIA:

- In Control Panel, select Programs and Features.

- In the opened window, select the Microsoft Office installation and click Change.

- Select Add or Remove Features.

- Click Continue.

- On the Installation Options page, click the plus sign (+) to expand the application for which you want to install the PIA.

- Click the drop-down arrow next to .NET Programmability Support, then select Run from My Computer.
